9945040022, 89632541236

Total Industry experience of 8 years. Have 3.5 years of freelancing experience extra. Good understanding of all phases in software development life cycle. Seasoned in gathering requirements, conducting gap analysis and feasibility study. Knowledge of conducting risk analysis and impact analysis. Good experience in design and development of software applications using java/j2ee technologies. Have experience leading a team and client interaction.

Professional Skills:

- Gap Analysis/Requirements gathering
- Efforts estimates calculation.
- Design of modules.
- **Programming** - Java, J2EE, Servlets, JSP, Struts, EJB,JDBC, Webservices, UML, Ajax, HTML, CSS, extjs, javascript, Design patterns, JDBC, Spring, Hibernate, Liferay portlets
- **RDBMS** – Oracle, Postgres
- **Tools** – Eclipse, MyEclipse, SQL Developer, Rational Rose, STS, RSA, IntelliJ IDEA
- **Servers** – Tomcat, OC4J, Jboss, Websphere

Work Experience:

- Working with Netcracker Technology as a Technical Lead (May 2016 – till date)
- Worked with UST Global as a Senior Systems Analyst (Jan 2015 – Apr 2016)
- Worked with Indecomm Global Services as a Technical Lead (Aug 2012 – Dec 2014)
- Worked with Mastek Ltd.as a Senior Software Engineer. (Dec 08 – May 12)
- Worked as a freelancer from Mar 05 to Nov 08

Projects:

Self Service Portal (From May'16)

Skills Used	Liferay with tomcat, portlets, IntelliJ IDEA
Project Description	Portal is implemented using JSR286 specification that describes structure and lifecycle of site pages that are constructed from Portlets. Liferay CMS is used for building this project. Using the portal, users can view, compare and buy telecom products.

Roles/Responsibility	Development.
-----------------------------	--------------

BCC (From Jan'15 – Apr'16)

Skills Used	Spring, RSA, Oracle
Project Description	A batch program that generates benefit comparison chart.
Roles/Responsibility	Design and development. Provide technical support to team. Track work status. Plan tasks. Design/code reviews.

Eportal (From Aug'12- Dec'14)

Skills Used	JSP, Java Beans, Spring, Hibernate, STS, Jboss, Ajax, HTML, Javascript, Postgres, MDB
Project Description	A self provisioning portal for a client of payment domain
Roles/Responsibility	Design and development of new components. Provide technical support to team. Client interaction. Track work status. Plan tasks. Design/code reviews. Monitor process compliance.

Point of Sale (From Apr'09- May 12)

Skills Used	JSP, Java Beans, Struts, MyEclipse, Tomcat, Oracle, Sql Developer, Ajax, HTML, Javascript, OC4J
Project Description	Point of sale system is an independent system that empowers broker/sub-broker at the front-end of the business to perform

	business acquisition and initial risk-selection tasks. It provides ease of use which enables the broker/sub-broker to perform quote, retrieve quote, convert quote to policy and online policy issuance.
Roles/Responsibility	Preparation of FRS & Efforts estimates. Assign tasks to team members and track the progress. Design and development of new components.
Client	National Automotive Insurance Company.

NHS Spine – Security & Authentication (From Dec'08 – Mar'09)

Skills Used	JSP, Java Beans, Struts, EJB, Eclipse, Tomcat, Oracle, Selenium, Sun Application Server.
Project Description	End Point Registration (EPR) of the Spine system is the generic term for an accredited system or a message handling system. In general terms, an accredited system is the application that provides functionality to an end user. Each accredited system is required to be registered with a message handling system whose function is to route messages to and from the accredited system.
Roles/Responsibility	Defect Fixing, writing Test Scripts, Enhancements.
Client	British Telecom

Health Care Management System (From Mar'08 – Nov'08)

Skills Used	JSP, Java Beans, Struts, EJB, Eclipse, WSAD, UML, Tomcat, Websphere Application Server, Rational Rose, Erwin.
Project Description	A hospital management system that integrates all the activities of a hospital. It is an effort to minimize the time a patient need to spend for registration purposes at various counters. A common database is maintained which contains all the hospital related data. Details of

	patients, their treatment, their registration validity etc are quickly accessible from any of the counter let it be OPD, IPD, Pharmacy or Laboratory.
Roles/Responsibility	Handling team, Requirement analysis, software modeling using UML, Development.
Client	Actionet
