- Working as Senior Project Engineer in Wipro (For State Street bank client) from June 2016.

Projects Undertaken

UBS-Swiss Bank

Duration: August-2013 to Jan-2016

Client: Swiss Bank

Project Description:

Tracking Global Registration System is a web-based application that will provide the Compliance Registration Unit a workflow platform to record and monitor regulatory licenses and Continuing Education obligations for UBS Investment Bank (IB) and Wealth Management Business Banking (WMBB) registered employees. TGRS:As such, there are variations of TGRS customized to meet the needs of each region and business entity. IB tracks regulator registrations, exams, continued education, terminations. WM tracks broker, branch and firm registrations, disclosures, terminations and training. Broker insurance licenses and appointments are also tracked in WM. The registration and license information are also sent and downloaded from the relevant regulators e.g. NASD, DTCC to meet regulatory requirements. Electronic filings to the regulators can also be done from TGRS. For instance, when a broker is terminated, the compliance user will create a termination U5 record and TGRS will generate an electronic filing that is sent to NASD. Compliance users also use the information in TGRS to generate Business Object reports through Info View (BIMS) to meet their individual business requirements.

Roles & Responsibilities:

Active involvement in understanding the Business Requirement. Interaction with the client and onsite coordinator, clarify and firm up the requirements in Functional/User specifications. Developed work Flow using Struts and Servlets technology. Prepared Impact analysis, design alternative solutions to address enhancements and to fix bugs. Actively participating as part of the testing and clarifications within internal team.

- Understanding the Business Requirement and Data Model.
